

Update 18: Madrid, Spain - Declares State of Emergency to Contain Surge in COVID-19 Cases

- Spanish government has declared a state of emergency to keep Madrid in partial lockdown as countries across Europe struggle to deal with the continuing surge in new COVID-19 cases
- The government decided to use its emergency powers to lockdown Madrid after suffering a major legal defeat on October 08, when Madrid's top regional court declared illegal its earlier effort to isolate Madrid from the rest of Spain
- The intense feuding between the government and the regional administration of Madrid is highlighting the failure of Spain's politicians to coordinate their response to the COVID-19
- The restrictions would be effective immediately and remain in place for 15 days
- The Madrid region's 14-day infection rate of more than 560 COVID-19 cases per 100,000 residents is more than twice Spain's national average of 256
- As of now, Spain has reported 890,367 confirmed COVID-19 cases with 32,929 deaths (3.69% of total reported cases)
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult Ministry of Health of Spain (<https://www.mscbs.gob.es/>) for the latest information on COVID-19 in Spain

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
