

# Update 34: Hebei, China - Reports Highest Daily Increase of ~103 New COVID-19 Infections Since July 2020

- Mainland China saw its biggest daily increase in COVID-19 cases in more than five months, as new infections in Hebei province surrounding Beijing continued to rise
- Hebei accounted for 82 of the 85 new local infections reported with Liaoning Province also reporting two new cases and Beijing reporting one new case
- The country also saw 18 new imported infections from overseas
- The total number of new COVID-19 cases stood at 103, the highest since 127 cases were reported on July 30, 2020
- However, it should be noted that the recent case tallies remain a small fraction of what the country saw at the height of the outbreak in early 2020
- Authorities are moving aggressively to curb its spread to avoid another national wave of infections
- In addition, a county in the north-eastern Heilongjiang province announced a lockdown after reporting new COVID-19 infections
- As of now, the country has reported 87,591 confirmed COVID-19 cases with 4,634 deaths, 5.2% of total reported cases, and 82,260 recoveries, 93.9% of total reported cases
- On the other hand, when compared to the overall population of the country, confirmed COVID-19 cases and fatality rate stands at 0.006% and 0.0003%, respectively
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult Chinese Center for Disease Control and Prevention (<http://www.chinacdc.cn/en/>) for latest information on COVID-19 in China

# Impact level Definitions

Impact Level	Definitions
Immediate	<b>Certain</b> - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	<b>Highly likely to occur in the near term (within 3 months)</b> - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	<b>Likely to occur in the mid-term (within 3 to 6 months)</b> - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	<b>Possible in the long-term (after 6 months)</b> - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
