

# Update 27: Zimbabwe - Records Highest Death Toll Since March 2020

- Zimbabwe witnessed its highest number of COVID-19 fatalities in a single day on January 14, 2021, with health officials reporting 47 deaths and 1,112 new infections since the onset of the pandemic in the country last March 2020
- Despite concerns that the rate of recovery from the respiratory illness is dwindling, officials reported 1,056 new recuperations
- Mashonaland West province suffered the most losses on January 14, 2021, after recording 20 deaths followed by the capital, Harare, with 10 deaths
- The rapid increase in both Covid-19 infections and deaths has been attributed to the movement of people during the festive holidays
- It was also due to the new COVID-19 variant which was discovered recently in South Africa
- A 30-day hard national lockdown is currently in place as authorities try to mitigate the pandemic, with all but essential businesses closed
- As of now, the country has reported 25,368 confirmed COVID-19 cases with 636 deaths, 2.5% of total reported cases, and 14,714 recoveries, 58.0% of total reported cases
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult Ministry of Health of Zimbabwe (<http://www.mohcc.gov.zw/>) for the latest information on COVID-19 in Zimbabwe

# Impact level Definitions

Impact Level	Definitions
Immediate	<b>Certain</b> - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	<b>Highly likely to occur in the near term (within 3 months)</b> - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	<b>Likely to occur in the mid-term (within 3 to 6 months)</b> - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	<b>Possible in the long-term (after 6 months)</b> - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
