

Update 1: Burundi - Nationwide Confirmed COVID-19 Infections Increase to 473

- As of September 21, Burundi recorded a single confirmed case of COVID-19 out of 2,254 samples tested between September 14 and 20
- The positive case was detected in a group of Burundians returning from exile from Tanzania
- On July 6, authorities announced a massive free screening campaign for the population for a period of three months
- During this campaign, Ministry of Health conducted 31,523 COVID-19 tests, which revealed 282 positive cases and zero deaths, to date
- The cumulative positive COVID-19 cases, before and during this campaign, amounts to 473 with 462 recoveries, one death, and ten currently under medical supervision
- The overall positivity rate is estimated at 1.87%, the lethality or risk of dying from the virus is 0.22%, and the recovery rate stands at 81.37% in the country
- Official figures indicate that 25 of the 47 health districts of Burundi (53.19%) recorded approximately one confirmed case
- The three Burundian provinces that reported no infections are Bururi (South), Mwaro, and Muramya (Center)
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult Ministry of Public Health and the Fight Against AIDS (Burundi) (<http://minisante.bi/>) for the latest information on COVID-19 in Burundi
