

# Update 16: Iran - Reports Highest Daily Increase of Over 5,000 COVID-19 Cases, Raising National Total to 539,670

- On October 20, 2020, Iran reported highest single-day toll of new COVID-19 cases since the start of the pandemic with more than 5,000 new infections
- Iran's health ministry reported that 322 people had died from the virus, pushing the death toll to over 31,000
- The new infection counts on October 20, 2020, eclipsed the previous high of 4,830 last week
- Iran, which emerged early on as an epicenter of the virus, has seen its worst wave of deaths from the illness in recent weeks
- Hospitals in the hard-hit capital of Tehran are overflowing
- Also, it is reported that 31,000 nurses have been infected with the COVID-19 in the country, with 6,000 currently sick and staying home from work and 54 confirmed dead
- Over 7,600 more nurses would be deployed to compensate for dire staff shortages across the country's hospitals
- The increase comes after Iranians packed cafes and restaurants at vacation spots during recent national holidays, and after schools reopened for in-person instruction last month
- The government has resisted a total lockdown because it does not want to further weaken an economy already devastated by unprecedented US sanctions
- With the increase in death toll, authorities are now starting to impose more restrictions
- The government closed museums, libraries, beauty salons, schools and universities in Tehran earlier this month, and imposed a mask mandate outdoors
- As of now, the country has recorded a total of 539,670 COVID-19 cases, with 31,034 (~5.8% of total cases) related deaths, and 434,676 recoveries (~80.5% of total cases)
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the Ministry of Health of Iran (<http://ird.behdasht.gov.ir/>) for the latest information on COVID-19 in Iran

# Impact level Definitions

Impact Level	Definitions
Immediate	<b>Certain</b> - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	<b>Highly likely to occur in the near term (within 3 months)</b> - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	<b>Likely to occur in the mid-term (within 3 to 6 months)</b> - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	<b>Possible in the long-term (after 6 months)</b> - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
