

Washington DC - Reports Highest Daily Increase of 206 New COVID-19 Cases

- On Tuesday, November 10th, Washington DC recorded 206 new COVID-19 cases, the largest increase in a 24-hour period since May, 2020
- The reported increase is more than double what the city has been reporting in recent days
- Washington DC's seven-day rolling average of new cases has been in the 80s to 90s for the past two weeks
- It is unclear what caused the surge in new infections, but close proximity of people voting in-person at polls, Halloween celebrations, and recent gatherings for President-elect Joe Biden's victory could be contributing factors
- More tests were administered in Washington DC last week (31,684) than this week (29,981), so the increase in infections doesn't appear to be due to greater testing
- As of now, the United States of America reported 10,708,630 confirmed COVID-19 cases with 247,397 deaths (2.3% of total reported cases), and 6,648,679 recovered (62.1% of the total reported cases)
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the United States Department of Health and Human Services (<https://www.hhs.gov/>) for the latest information on COVID-19 in the United States of America

Guidance

Actions to consider:

- Consider implementing suggested actions related to 'Increase in Positive Cases/Deaths' and under the 'COVID-19: Actions to Consider' section below / next page

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
