

Update 19: Hungary - Plans to Extend Entry Restrictions Due to Delay in COVID-19 Vaccine Rollout by European Commission

- Hungary's Foreign Minister Péter Szijjártó said that European Commission's slow vaccine purchase procedures have impeded Hungary's government from lifting the COVID-19 restrictions, which are currently in place
- Szijjártó has blamed the European Commission for the delay of the population's vaccination
- According to him, the European Union (EU)'s vaccines reached member states a little late
- Prime Minister Viktor Orban previously announced that Hungary would prolong its existing COVID-19 restrictions until at least February 1, 2021
- Meanwhile, Orban said that it appeared the second wave of the epidemic had been reined in and recoveries outnumbered new infections
- Also, Orbán said that Hungary is in a position to obtain a Chinese vaccine in large quantities but first the Hungarian health authorities must approve it
- He added that the vaccination rate in the EU is below 1 percent due to lack of availability
- As of now, the country has reported 350,587 confirmed COVID-19 cases with 11,264 deaths, 3.21% of total reported cases, and 227,325 recoveries, 64.84% of the total reported cases
- When compared to the overall population of the country, confirmed COVID-19 cases and fatality rate stands at 3.63% and 0.11%, respectively
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the Ministry of Health (<https://www.nnk.gov.hu/>) for the latest information on COVID-19 in Hungary

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
