

Update 32: Israel - Unemployment Rate Rises to 19.5% Amid COVID-19 Pandemic

- According to the Central Bureau of Statistics and the Israeli Employment Service, the COVID-19 pandemic crisis has led to a spike in Israel's unemployment count to around 805,000
- With the new figure, the unemployment rate in Israel stands at 19.5%, compared to 13.9% in early January, 22.7% in last mid-October and a peak of 27.5% at the end of April 2020 with more than 1 million unemployed people
- This is a significant increase compared to 565,000 unemployed in Israel as recorded in January 04, 2021
- The increase in the number of the unemployed is explained by the third nationwide COVID-19 lockdown imposed on December 27, 2020, with some of its restrictions still in effect
- The unemployment rate in the country stood at 3.9% before the pandemic outbreak last February in Israel
- Additionally, Israel plans to ease more restrictions on businesses on February 21, 2021 and reopen hotels and gyms to those fully vaccinated or deemed immune after recovering from COVID-19
- On February 15, 2021, Israel's Ministry of Health reported 5,647 new COVID-19 cases and 28 new fatalities
- As of now, the country has reported 730,293 confirmed COVID-19 cases with 5,414 deaths, 0.74% of the total reported cases and 670,478 recoveries, 91.81% of the total reported cases
- When compared to the overall population of the country, confirmed COVID-19 cases and fatality rate stands at 8.35% and 0.06%, respectively
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the Ministry of Health (<https://www.health.gov.il/English/Pages/HomePage.aspx>) for the latest information on COVID-19 in Israel

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
