

Update 8: Yemen - Faces World's Worst Famine, Adding Further Challenges To COVID-19

- conflict-torn Yemen may face the worst famine the world has seen for decades
- The UN humanitarian chief has warned and applied to Contribute generously to this year's UN humanitarian for US\$3.85 B
- The 4 million people who didn't receive food last year are among those essentially in the long, slow, brutal, painful, agonizing process of starving to death, Lowcock told a virtual briefing for a group of reporters
- Without that funding, a lot more people will die, there could be catastrophic prospects unleashed in the country
- The devastating conflict in the Arab world's poorest country erupted in 2014 when Iranian-backed Houthi rebels seized Yemen's capital, Sanaa, and much of the country's north
- That prompted a US-backed Arab military coalition led by Saudi Arabia and the UAE to intervene months later in a bid to restore the government of Yemeni President Abed Rabu Mansour Hadi to power
- Last year's US\$3.4 B appeals received only about US\$1.8 B, with the UN receiving only US\$300 M of the US\$500 M that Saudi Arabia pledged
- As of now, Yemen has reported 2,221 confirmed COVID-19 cases with 624 deaths (28.0% of total reported cases), and 1,433 recovered (64.5% of the total reported cases)
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the Republic of Yemen Ministry of Public Health & Population (<http://www.moh.gov.ye/>) for the latest information on COVID-19 in Yemen

Targets Affected:

Yemen

Category(s):

Geo-Political Risk

Event:

Coronavirus (COVID-19) Incident(s)

Guidance

Actions to consider:

- If there is a presence of business operations, SW Subscribers are advised to ensure that Business Continuity plans and programs are commensurate with the level and types of risk exposures of this location
- It is advised that current Business Continuity Plans are updated and activated as required as per the changing risk environment to ensure no or minimal disruptions
- In an event of extended risk disrupting business operations, evaluate options to migrate critical processes to nearby unaffected regions
- Consider implementing suggested actions related to 'Increase in Positive Cases/Deaths' under the 'COVID-19: Actions to Consider' section below / next page

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
