

Update 41: Ontario, Canada - Re-Imposes Lockdown Starting April 03, 2021 Amid Steady Rise in COVID-19 Variant Cases

- The Canadian province of Ontario will go into a four-week lockdown effective April 03, 2021 amid a steady rise in variant cases of the COVID-19
- The lockdown restrictions are imposed on businesses and residents across Ontario
- The restrictions include ban of indoor public events, restaurants won't be allowed to serve customers except for takeout and delivery orders, supermarkets and pharmacies will operate at 50% capacity and other retailers at 25%
- However, the restrictions would not be as tight as the province-wide lockdown that was imposed in December 2020
- Some regions, including the city of Toronto, are already operating under similar rules
- More than half of the cases reported were in Toronto and Peel
- New daily cases in the province have more than doubled since the first week of March 2020
- Canada's slow vaccine progress is compounding the problem: less than 2% of the population is fully vaccinated, as the government has had difficulty importing enough shots and the country has little vaccine manufacturing capacity of its own
- In total, 5,896,845 vaccine doses have been given and 696,128 people, 1.8% of total population have been fully vaccinated against COVID-19
- As of now, the country has reported 987,918 confirmed COVID-19 cases with 23,002 deaths, 2.33% of total reported cases, and 915,348 recoveries, 92.65% of the total reported cases
- When compared to the overall population of the country, confirmed COVID-19 cases and fatality rate stands at 2.62% and 0.06%, respectively
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the Ministry of Health (<https://www.canada.ca/en/health-canada.html>) for the latest information on COVID-19 in Canada

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
