

Update 35: California, United States of America - Plans to Lift Most COVID-19 Restrictions Starting June 15, 2021

- California, US plans to lift most COVID-19 restrictions on businesses and workplaces starting June 15, 2021, with officials saying enough people should be vaccinated by then to allow for life to almost get back to a pre-pandemic normal
- The announcement comes as states across the country have lifted health restrictions as more people get vaccinated
- California, US had some of the nation's strictest pandemic rules, becoming the first to institute a statewide stay-at-home order last spring and adopting a complex, color-coded tier system that dictated which businesses could open and at what capacity depending on how widespread the virus was in a county
- California, US has administered 20 million shots, including 4 million to the hardest-hit ZIP codes, and COVID-19 infection rates are low
- But the pandemic has taken its toll, with more than 58,000 people dead from the virus, businesses closed and students who have been out of classrooms for much of the year
- Businesses will be allowed to open with common-sense risk reduction measures, including mandated masking and encouraging vaccinations
- The state will continue contact tracing and testing
- Most capacity limits will be lifted, although large-scale indoor events, such as conventions, will be allowed only with testing or vaccination verification requirements
- Vaccine eligibility will expand to people in California, US 16 and older starting April 15, 2021, although some counties have already started vaccinating young adults
- As of now, the country has reported 31,560,438 confirmed COVID-19 cases, with 570,260 deaths, ~1.8% of the total reported cases, and 24,122,221 recoveries, ~76.4% of the total reported cases
- When compared to the overall population of the country, confirmed COVID-19 cases and fatality rate stands at ~9.5% and ~0.2%, respectively
- In total, 167,187,795 vaccine doses have been given and 62,392,065 people, ~18.9% of the total population have been fully vaccinated against COVID-19
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments
- Please consult the United States Department of Health and Human Services (<https://www.hhs.gov/>) for the latest information on COVID-19 in the United States of America

Impact level Definitions

Impact Level	Definitions
Immediate	Certain - Supply Wisdom recommends considering prompt action. Examples of Immediate level alert events may include bankruptcy filings, data breaches, unexpected curfews, strikes, power black-outs, major geo-political events etc.
High	Highly likely to occur in the near term (within 3 months) - Supply Wisdom recommends being in a state of readiness to take quick action. Examples of High level alert events may include withdrawal of rating by ratings agencies, hostile takeover, multiple cyber-attacks, new business policies causing significant hardship etc.
Medium	Likely to occur in the mid-term (within 3 to 6 months) - Supply Wisdom recommends reviewing current mitigation steps and being ready to take proactive actions if and when situation deteriorates further. Examples of Medium level alert events may include unplanned C-level exits, suppliers caught in bribery cases, economy slipping into recession.
Low	Possible in the long-term (after 6 months) - Supply Wisdom recommends taking proactive action if situation does not resolve. Examples of Low level alert events may include lawsuits filed against suppliers, client losses, air pollution alerts issued by country's local authorities, unexpected holidays announced for the location etc.
Informational	The event is pertinent information but does not have a risk element associated with it. Examples of Info level alert events may include launch of new solutions, partnerships signed, industry outlook, positive changes in government policies, announcements regarding launch of software parks/ free trade zones/special economic zones etc.
