

Update 60: France - Government Passes New Law to Curb the Surge in COVID-19 Cases

- On July 26, 2021, French Parliament approved a law that made special virus passports a part of daily life and vaccination mandatory
- A compromise was reached between the two Houses of parliament amid massive protests against the new measures
- On July 12, 2021, President Emmanuel Macron ordered that the health pass proof of full vaccination or a negative test is mandatory to visit any public venues such as cinemas, nightclubs, or even trains and planes
- This initially applies to only adults but will become mandatory for everyone above 12 years of age effective September 30, 2021
- The health pass can be in paper or digital format
- The law also requires all workers in the healthcare sector to start getting vaccinated by September 15, 2021
- The new law further says government decree will outline how to handle vaccination documents from other nations
- The rules will be applicable beyond November 15, 2021, depending on the pandemic situation
- Before the passage of this bill, approximately 160,000 people staged protests across the country against the special pass rule and mandatory vaccinations for health workers
